

# HARVESTERS

## 175 TRAILED COMBINE

**Great Value**

**Various Crops**

**Secondary Rotor**

The 175 model Trailed Harvester is available with headers for harvesting maize, soya beans, sorghum and sunflowers. The 175 combine has a unique intake and cleaning system. The main rotor with threshing beaters, enclosed by sieves, is angled to a specific degree to allow threshed crop to slide down and through the sieve to be collected in the holding hopper. The secondary rotor allows more threshing to remove as much unwanted material as possible.
