

PLOUGHS

MOULDBOARD FRAME PLOUGH

Adjustable Spacing

Three-point Linkage

Rugged Construction

This primary soil tillage machine is mounted on the tractor's universal three-point linkage system, for easy transport. The tower of the plough has been constructed from 100 x 25mm flat bar and bent to certain angles to absorb stress while ploughing. The mouldboard frame plough comes in various sizes ranging from 2 - 4 furrow with working widths from 350 - 400mm. This is a primary soil tillage machine.
