## STALK CHOPPER

**Dual Purpose**

**V-blade Configuration**

**Interchangeable Rollers**

Stalk Chopper rollers chop harvested residue, making the plant residue smaller and more manageable. Ploughs do not block up and the residue is buried easier in the soil and turned into organic compost. The unique design of the blades configuration is in a "V" format thus giving the Stalk Chopper a rolling effect, which reduces vibration on the draw bar of the tractor.
